

Curriculum Vitae

Saleh K. Ihmaid

Associate Professor Medicinal Chemistry

Biography

I am Dr. Saleh Ihmaid, acting chairman of the clinical pharmacy department, Faculty of Pharmacy at the Jadara University, Jordan. My first degree BSc (Pharmacy) from Baluchistan University, Pakistan, in 1998. Completed my MSc degree in Bio-pharmaceutical from the Department of Medicine, University of New South Wales, Australia in 2003. Awarded a PhD in Organic/Medicinal Chemistry from the La-Trobe University, Australia, in 2011.

Before joining Jadara University, I worked in the College of Pharmacy at Taibah University for 10 years. From 2012 till 2022 Associate Professor of Organic/Medicinal Chemistry Faculty of Pharmacy, Taibah University, Kingdom of Saudi Arabia. Acting chairman of the Department of Pharmacognosy and Medicinal Chemistry, Faculty of Pharmacy, Taibah University, Saudi Arabia from 2014 till 2016. Assistant professor of medicinal chemistry, Faculty of Pharmacy and Medical Science, I served as an academic advisor for pharmacy students. As an academic advisor, and help the students to define and develop their personal and academic goals. I work with each student to identify his/her individual needs and refer each to the proper campus resource. Take extra time to advise students who change majors, or are in academic trouble, making sure that they are referred to the Undergraduate Advising Resource Center (UARC). Always maintain current knowledge of academic policies and any changes in pharmacy plans, and communicate with the registrar office to solve as much as I can any problems with registration. In regard to the curriculum, served on the school curriculum committee as a member for two years and was directly involved in improving our pharmacy program to improve the flow, clarity and overall organization of the courses to enhance students learning. I was involved in developing a master plan for Pharmaceutical and Medicinal Chemistry.

Al-Ahliyya Amman University, Jordan from 2011 till 2012.

I am a faculty member of the Department of Pharmacognosy and Medicinal Chemistry during the same period I deliver my teaching and conducting my research. I supervised many undergraduate students in their research projects.

I am an Associate Professor of Medicinal Chemistry with more than 50 publications in peer-reviewed journals. My H-index is 16 with a round 575 citations. The major areas of my research interest are design, development and modeling of potent small molecules as anticancer agents.

BIOGRAPHICAL AND PERSONAL INFORMATION:

Born: September 11th, 1975, Kuwait.

Sex: Male.

Marital Status: Married.

Country of Citizenship: Australian/Jordanian.

Permanent Address: Dept. of Pharmacognosy & Pharmaceutical Chem., Faculty of Pharmacy, Jadara University, Irbid. The Hashemite Kingdom of Jordan.

Phone: +962-795368776 (Mobile Phone).

Email: saleh_ihmaid@yahoo.com.au

EDUCATION:

- **PhD in Medicinal Chemistry and Drug Design, May 2011, La Trobe University, Australia.**
 - Thesis title: Synthesis, Identification, DNA-PK, Anti-platelet and Anti-microbial activity of 2-Amino-Benzo- and Naphth-1,3-Oxazin-4-One.
 - Supervisors: Prof. Jasim Al-rawi and Dr. Christopher Bradley.
- **Master Degree in Bio-pharmaceutical, 2003, University of New South Wales, Australia.**
 - Thesis title: The use of Agarose Gel Assays of Bis-intercalating Di-acridines on the Super-Cooling of Covalence Closed Circular DNA.
 - Supervisors: Prof. Larry Wecklin.
- **Bachelor degree in Pharmacy, 1998, Baluchistan University, Pakistan.**

MAJOR RESEARCH INTEREST:

- Design, development and modeling of potent small molecules as anticancer agents.

Teaching units

➤ Pharmaceutical and Medicinal Chemistry I

This course is an introduction to organic chemistry, focusing primarily on the basic principles to understand the structure, properties, nomenclature, isomerization, stereochemistry, reactions and practical methods for identification of major organic functional group. This course also provides an introduction to the chemistry of heterocyclic compounds.

Upon successful completion of the course, the students will be able to: 1) Explain the atomic properties of organic compounds. 2) Describe Nomenclature (IUPAC and common) and drawing structure of organic compounds. 3) Clarify the principal aspects of stereochemistry of organic reactions and their mechanisms. 4) Identify practically organic compounds.

➤ Pharmaceutical and Medicinal Chemistry II Course Description

This course focuses on the basics aspects of pharmaceutical chemistry and current targets involved in the drug discovery process. Students will discuss the structure-activity relationship (SAR) concept for some drug classes such as cardiovascular drugs, anti-diabetic drugs and calcium regulating drugs. In addition, student will also be able to quantify the physicochemical properties and their effects on the biological activity.

Upon successful completion of the course, the students will be able to: 1) Recognize the influence of physicochemical properties of the drug on its pharmacological action. 2) Identify the nature of drug-target interaction. 3) Classify drug classes according to chemical structure, properties and mechanism of action. 4) Design and analyze some drugs of cardiovascular and anti-diabetic activity.

➤ Pharmaceutical and Medicinal Chemistry III

This course covers major drug classes of chemotherapeutic agents with respect structure, drug discovery and development process, physicochemical properties, drug target interactions and structure-activity relationship (SAR) analysis.

Upon successful completion of this course, students will 1) Classify major drug classes with respect to their chemical properties. 2) Define the structure activity relationship (SAR) of chemotherapeutic agents. 3) Identify practically and computationally some medicinal compounds. 4) Explain different mode of action and metabolic pathway of chemotherapeutic agents.

➤ Pharmaceutical and Medicinal Chemistry IV

This course provides the knowledge of structural analysis of different drug classes targeting nervous system and focuses on the extensive study of their structure-activity relationships (SAR).Drugs affecting autonomic and central nervous systems, steroidal anti-inflammatory drugs (NSAID) as well as narcotic analgesics are targeted in this course.

➤ Chemical Analysis (Spectroscopy part).

EMPLOYMENT HISTORY:

- 2022-present:** Associate Professor of Organic/medicinal Chemistry (Faculty of Pharmacy, Jadara University, Jordan).
- 2018-Present:** Associate Professor of Organic/medicinal Chemistry (Faculty of Pharmacy, Taibah University, Kingdom of Saudi Arabia).
- 2014-2016:** Acting Chairman of the Department of Pharmacognosy and Medicinal Chemistry, Faculty of Pharmacy, Taibah University, madina Al-Munuwarah, Suadi Arabia.
- 2012-2018:** Assistant Professor of Organic/Medicinal Chemistry (Faculty of Pharmacy, Taibah University, Kingdom of Saudi Arabia).
- 2011-2012:** Assistant Professor of Medicinal Chemistry (Faculty of Pharmacy & Medical Science, Al-Ahliyya Amman University, Jordan).
- 2010-2011:** Research Assistant (Faculty of Pharmacy, LaTrobe University, Australia).
- 2007–2010:** Demonstrator in the Undergraduate Organic Chemistry Laboratories (La Trobe University, Australia).
- 2003-2007:** Production Support Associate/Process Validation (Hospira Pharmaceuticals Australia Pty Ltd).
- 2001-2003:** Laboratory Assistance (University of New South Wales, Australia).
- 1998-2000:** Pharmacist (Al-Qayrawan Pharmacy, Jordan).

AWARDS:

Australian Scholarship to earn Ph.D degree for the period 2007-2011

- School of Pharmacy and the Research Institute of Pharmaceutical Sciences, La Trobe University Bendigo, **Australia.**

MEMBERSHIPS:

- Registered pharmacist in Jordan.
- Member of the Pharmaceutical Society of Jordan.
- Member of the Institute Medical Scientists of Australia.

LABORATORY SKILLS:

Laboratory skills, including use of highly complex analytical machines and apparatus developed through degree especially honors project.

- Capable of operating Nuclear Magnetic Resonance Spectroscopy (NMR).
- Capable of operating FT-IR.
- Capable of running Column Chromatography.
